how will the learning be done?

Students must feel they are achieving something. They must experience success in your classes and this is why it is important to really 'know' them as learners and teach them to be collaborative, to work on their own and to work as a whole. They must learn through many forms including seeing, hearing, doing, feeling, talking, making, moving and you must take every opportunity to mix it up and allow this to happen without fear, through engaging and meaningful tasks and interactions.
